

Move file from Audacity to iTunes

1. **MAKE YOUR CONTENT:** Create Audacity audio file and **SAVE** as MP3
2. **MOVE YOUR AUDIO FILE:** Import the MP3 audio file into **iTunes**
3. **TRANSFER IT TO YOUR IPOD:** Create a playlist in iTunes & **SYNC** to Ipod

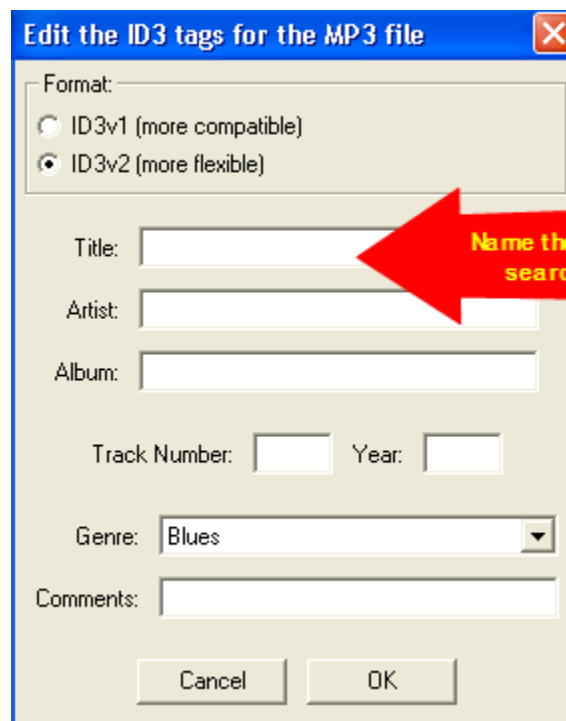

1.A

1.B

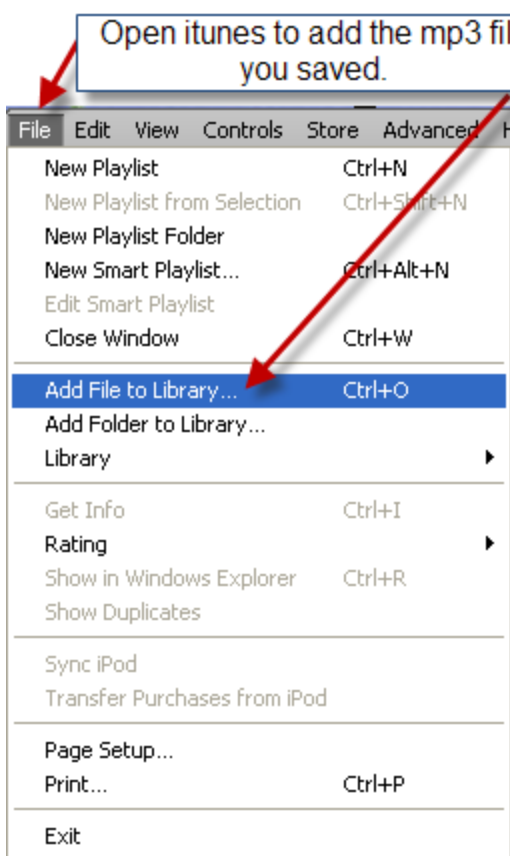

This is the file name you'll look for to import into iTunes.

1.C

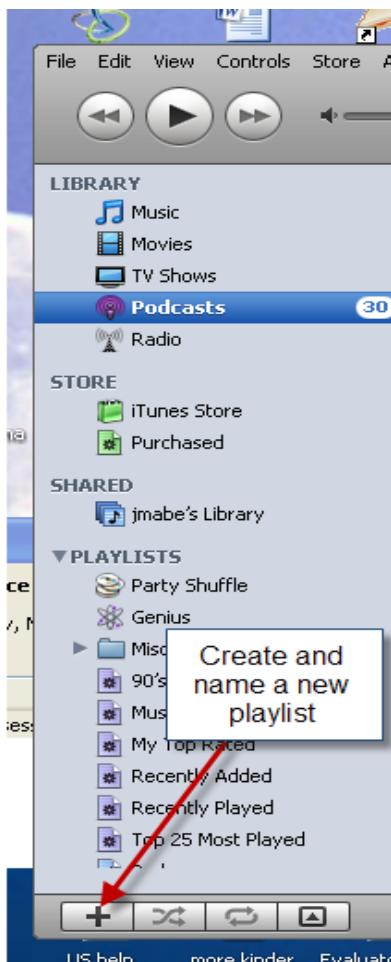

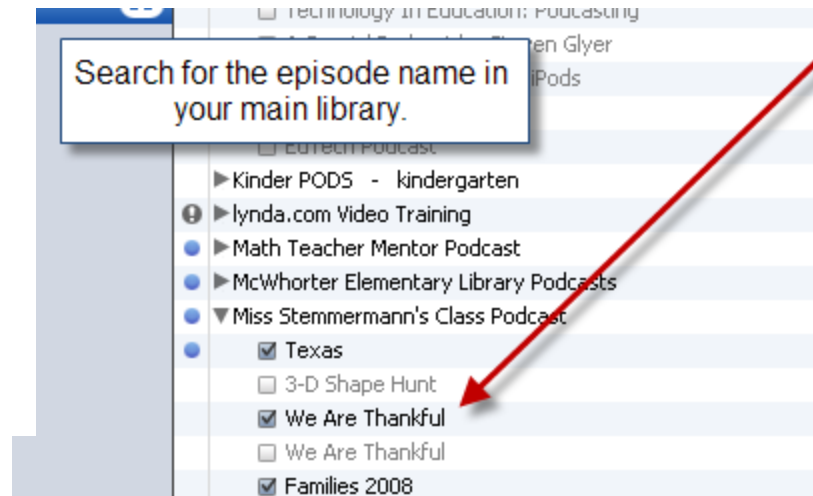

The TITLE of your episode will appear inside iTunes....this may be different than the file NAME of your MP3.

2.A

2.B

3.A See illustration to the left to create and name a *new playlist*

3.B Drag the *titled file* from the right pane over to your playlist,

3.C Drag the *playlist title* up to your ipod icon and it will sync.
